FM-48oAKE-HC (SB) FLAKE ICE MAKER / FM-48oAKE-HC-N (SB) NUGGET ICE MAKER

Product Description

The FM-48oAKE-HC (-N) is a modular HydroCarbon Ice maker which produces either Flake or Nugget Ice. Flake and Nugget Ice are popular for a variety of cooling purposes, including the display of fish and fresh produce as well as in the medical world for cooling blood and organs. This ice is often used to prepare cocktails and drinks because of the quickness of cooling and limited dilution of drinks.

- Hoshizaki ice makers are micro computer controlled, controlling the ice making process to perform at its best under varying circumstances, without having to make physical adjustments.
- The characteristics of the ice produced by Hoshizaki ice makers means that 'freeze-burn' is no longer an issue when displaying fresh fish or produce.
- Quality stainless steel auger and evaporator increase the life expectancy of these components and the whole ice maker, as well as reducing costly maintenance visits.
- An easily cleanable air filter allows end users to carry out a routine cleaning schedule, extending product life expectancy and reducing the frequency and costs of maintenance call-outs.
- Work at low pressure reduces the stress on the system units.
- 100% HFC free CO₂ foam insulation use contributes to reduction of running costs by maintaining a uniform unit temperature.
- Energy efficiency of ice maker is ensured by the use of extremely low level of the refrigerant R290.
